

MATHEMATICS Compulsory Part
PAPER 1
Question-Answer Book

9:00 am — 11:15 am (2¼ hours)

This paper must be answered in English

INSTRUCTIONS

1. After the announcement of the start of the examination, you should first write your Candidate Number in the space provided on Page 1 and stick barcode labels in the spaces provided on Pages 1 and 3.
2. This paper consists of THREE sections, A(1), A(2) and B.
3. Attempt ALL questions in this paper. Write your answers in the spaces provided in this Question-Answer Book. Do not write in the margins. Answers written in the margins will not be marked.
4. Supplementary answer sheets will be supplied on request. Write your Candidate Number, mark the question number box and stick a barcode label on each sheet, and fasten them with string INSIDE this book.
5. Unless otherwise specified, all working must be clearly shown.
6. Unless otherwise specified, numerical answers should be either exact or correct to 3 significant figures.
7. The diagrams in this paper are not necessarily drawn to scale.
8. No extra time will be given to candidates for sticking on the barcode labels or filling in the question number boxes after the 'Time is up' announcement.

5. The marked price of a book is \$168. The book is now sold at a discount of 25% on its marked price.

(a) Find the selling price of the book.

(b) It is given that the cost of the book is \$90, find the percentage profit of the book.

(4 marks)

6. (a) Solve the inequality $4(x+2) > \frac{11x-5}{5}$.

(b) Find the least integer satisfying both inequalities $4(x+2) > \frac{11x-5}{5}$ and $5+2x \geq -6$.

(4 marks)

7. In a polar coordinate system, O is the pole. The polar coordinates of the point A are $(24, 27^\circ)$. A is rotated clockwise about the pole O through 60° to point A' . It is given that the straight line L bisects $\angle AOA'$.
- (a) Write down the polar coordinates of A' .
- (b) Describe the geometric relationship between L and the line segment AA' .
- (b) If B is a point lying on L such that $OABA'$ is a rhombus, find the polar coordinates of B .

Figure 1

- (a) Find $\angle ADB$.
- (b) Find $\angle ABD$.

(5 marks)

[illegible]

2019/20-ME-MATH-CP 1 – 6

Answers written in the margins will not be marked.

9. The pie chart below shows the distribution of the numbers of books read by a group of students in a month, where $4 < x < 9$. It is given that the mean of the distribution is 6.25.

The distribution of the numbers of books read by this group of students in a month

- (a) Write down the interquartile range of the distribution.
- (b) Find x .
- (c) If a student is randomly selected from the group, find the probability that the selected student reads less than 7 books.

SECTION A (2) (35 marks)

10. Let $h(x)$ partly varies as x and partly varies as x^2 . Suppose that $h(-2) = 8$ and $h(3) = 33$.

(a) Find $h(x)$. (3 marks)

(b) Solve the equation $h(2x) = 16$. (3 marks)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

11. In Figure 2, ABC is a triangle. D and E are points lying on BC and AC respectively such that $\angle ABD = \angle ADE = \angle DCE$.

Figure 2

- (a) Prove that $\triangle ABD \sim \triangle DCE$. (3 marks)
- (b) Suppose that $AE = 14$, $BD = 6$, $AD = 6\sqrt{7}$ and $DE = 4\sqrt{7}$. Is ABC an equilateral triangle? Explain your answer. (3 marks)

Answers written in the margins will not be marked.

12. The stem-and-leaf diagram below shows the numbers of online hours spent by 20 students in a certain week:

Stem (tens)	Leaf (units)
1	0 2 2 4 5 5 7 8 9 9
2	k 4 6 7 8 9
3	2 5 6 9

where $0 \leq k \leq 4$, and k is an integer.

The box-and-whisker diagram below shows the distribution of the numbers of online hours:

- (a) Find a , b and k . (3 marks)
- (b) It is given that the mean of the numbers of online hours spent by 4 students is the same as the mean of the numbers of online hours spent by the original 20 students. It is found that two of these four data are 23 and 24. Is it possible that the median of the numbers of online hours spent by these 24 students is the same as the median of the numbers of online hours spent by the original 20 students? Explain your answer.

14. An hourglass is formed by connecting the vertices of two identical right circular conical container of radius 3 cm . It is given that the height of the hourglass is 12 cm . The hourglass is held vertically at the beginning and all the sand is located in the upper part of the inverted circular conical container. The surface of the sand remains horizontal and the height of the sand is h cm .

(a) Find the volume of the sand in terms of π . (3 marks)

(b) The sand now flows into the lower part of the circular conical container from the upper part of the inverted circular conical container at a constant speed of $\frac{4\pi}{45}$ cm³ per second, and all the sand drains away in just 1 minute.

(i) Find h .

(ii) When all the sand flows into the lower part of the circular conical container, the surface of the sand remains horizontal. A student claims that the height of the sand is less than 1 cm .

Do you agree? Explain your answer.

17. (a) In $\triangle ABC$, $BC = a$, $AC = b$ and $AB = c$. Denote the radius of the inscribed circle of $\triangle ABC$ by r and $s = \frac{a+b+c}{2}$.

(i) Prove that the area of $\triangle ABC = rs$.

(ii) Hence and using Heron's formula,

prove that $r = \sqrt{\frac{(s-a)(s-b)(s-c)}{s}}$.

(4 marks)

(b) The coordinates of the points P and Q are $(12, 0)$ and $(0, 5)$ respectively. Find the equation of the inscribed circle of $\triangle OPQ$, where O is the origin. (3 marks)
